

FundingTicks 2026 Resolution.

Dear Traders,

At FundingTicks, our objective has always been to build a sustainable futures firm that traders can rely on with fair trading conditions, clear rules, and reliable payouts.

Since our recent updates, we've listened closely to the feedback and concerns raised by our traders. We recognise that those updates created frustration and uncertainty. While we make our decisions with the best intentions to create a sustainable trading environment, when our community is affected, it is our duty to pause, reassess, and implement corrective measures for our trading community moving forward.

Therefore, over the past weeks, we conducted a full internal review of traders feedback, operations, systems, rules, and the team. As a result of this review, we are implementing the following effective immediately, to separate past activity from future standards:

1. All HFT-related profits deducted before December 16th will be fully reinstated for all affected active accounts.
2. From December 17th onward, profits generated from trades under one minute will not be counted, in line with recent updates.

***Full details regarding the 1-MIN RULE and the two points above is available in our [FAQ](#) to ensure complete clarity and transparency.**

FundingTicks Revamp Moving Forward

Alongside these corrective actions, we would like to introduce a broader FundingTicks Revamp focused on automation, enhancement of our operations, and therefore your trading and user experience. **Please rest assured that** no retroactive updates will be implemented in the future.

User Experience Revamp Updates:

- Direct progression from passed Evals to SIM-funded accounts.
- Removal of manual reviews.
- Removal of onboarding.

PRO+ Revamp Updates:

- Increased Drawdown across all PRO+ accounts.
- Evaluation stage : Consistency adjusted to 50% instead of 40% on all PRO+ accounts, enabling you to pass in 2 days.
- Introduction of a new scaling plan for contracts tradeable (Please refer to our [FAQ](#) for more details).

ZERO Accounts Revamp Updates:

- Increased Drawdown across all ZERO accounts.

LIVE Program Revamp:

- A more straightforward and transparent Live Program structure (please refer to our [FAQ](#) for more details).

Looking Ahead to 2026

As we enter the 2026 Year, our direction is clear :

Automation. Transparency. Stability.

We embrace this opportunity for a fresh start. Our priority and commitment to building trust and enhancing our traders' journey remains our primary focus. We are prioritizing the automation of operations to ensure a better trading and user experience built for long-term growth together.

We will continue to communicate transparently through our official channels as these updates are implemented and refined. Thank you to our FundingTicks Trading Community for continuing this journey with us.

Yours Truly,
The FundingTicks Team
